Git hooks intended for developers using [pre-commit](#) and [commitizen](#).

CI/CD components

GitLab CI/CD Catalog: <https://gitlab.com/explore/catalog/RadianDevCore/tools/pre-commit-crocodile>

`commits` - GitLab CI job to validate newly pushed commits

Validate commits added on a branch or for a merge request :

- **Show commits specifications** and syntax examples
- **Check commits automatically** with `commitizen` configurations
- **Run pre-commit checks** on all files
- **Deny WIP commits** on GitLab branches

Sources / .gitlab-ci.yml

```
include:
  - component: gitlab.com/RadianDevCore/tools/pre-commit-crocodile/commits@X.Y.Z # Adapt to latest release tag
    inputs:
      stage: prepare

stages:
  - prepare
  - ...
```
